

Cisco Packet Tracer Installation Guide

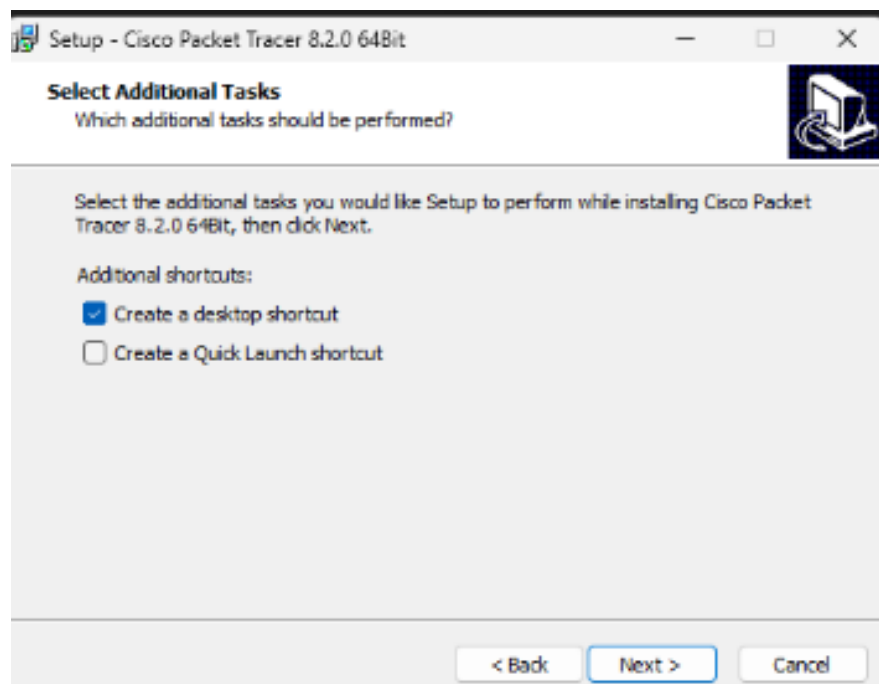

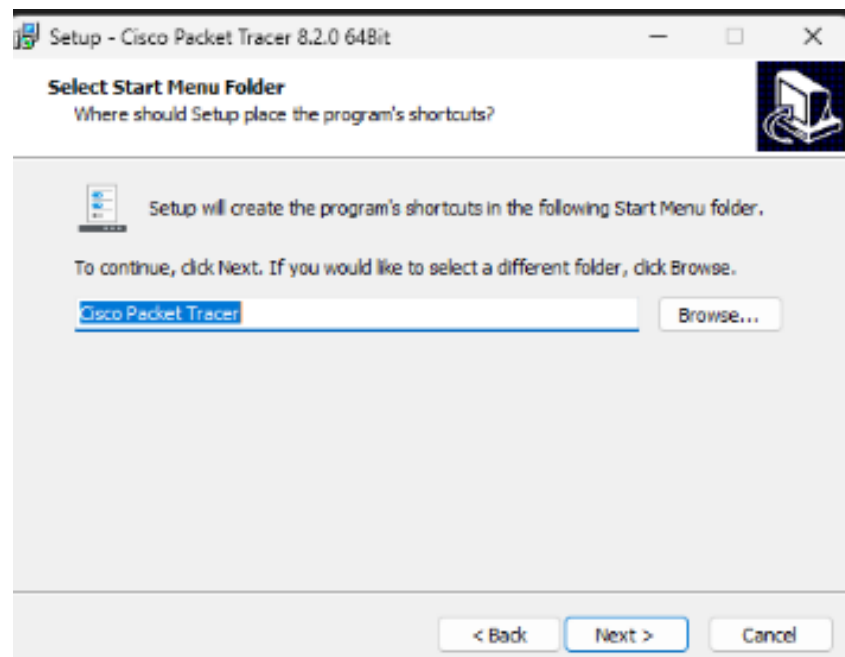

1. Based on the OS of your device, visit one of the links below to download the CISCO Packet Tracer Installer. Choose the appropriate one for your device:
 - a. Windows: <https://cisco-packet-tracer.fileion.com/windows/download>
 - b. MacOS: <https://cisco-packet-tracer.fileion.com/mac/download>
 - c. Linux: <https://cisco-packet-tracer.fileion.com/linux/download>

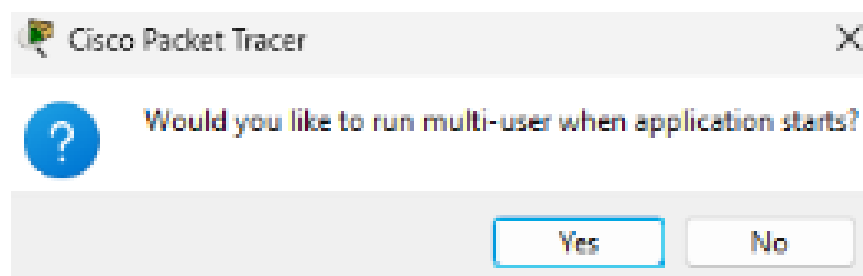

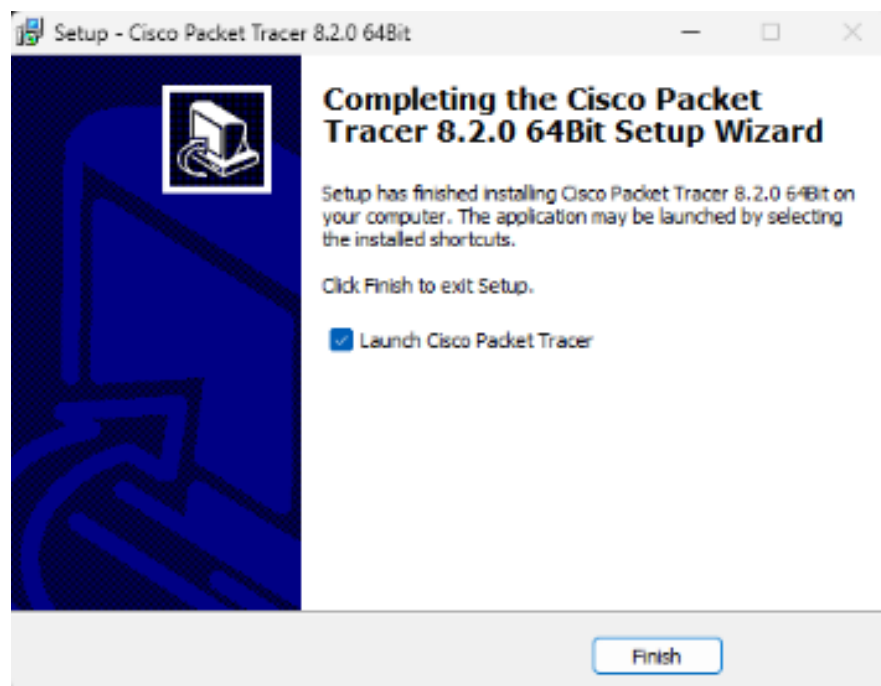

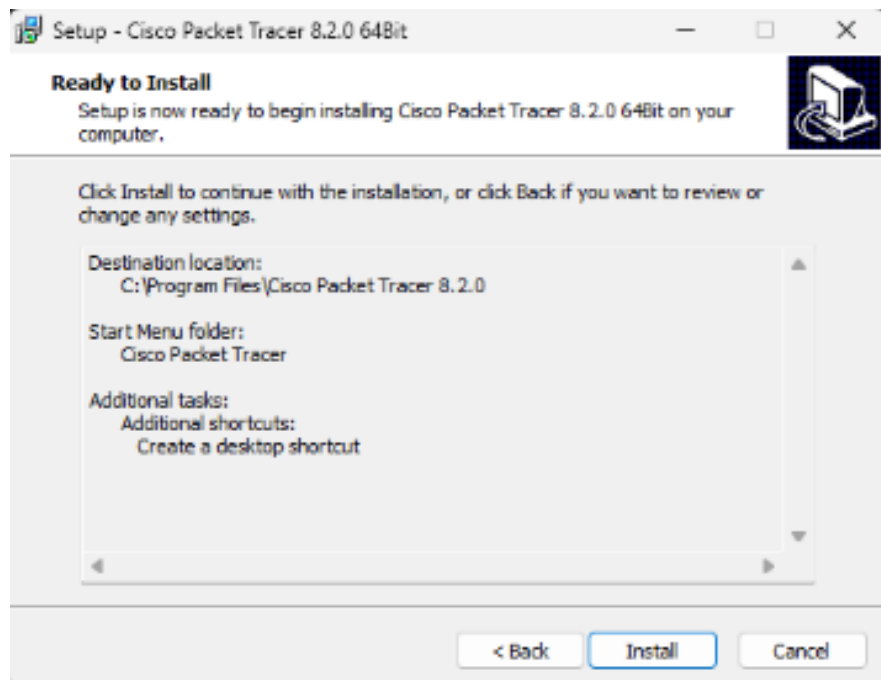

It might ask you to log in to your CISCO account before downloading. If you do not have an account at CISCO already, create an account using your Sabancı email.

2. Open the installer and follow the steps below:

3. Try to open CISCO Packet Tracer from the Desktop shortcut. If installation was successful, you should be able to see a screen similar to the one below
